SUMMARY

Product-minded professional with 2.5 years of experience driving cross-functional initiatives, launching internal products, and leveraging data to improve user workflows at scale. Expert in SAP, RICE prioritization, requirements gathering, roadmap development, user research, data analytics, stakeholder management, product discovery. Developed product strategy insights on Inshorts and Khan Academy covering engagement, monetization, and competitive positioning.

EXPERIENCE

Business Analyst/SAP Consultant | Signify (Philips Lighting), Bangalore

Jul 2023 – Dec 2025

- Drove end-to-end implementation of the Corporate Card product using SAP ABAP, gathering business requirements from 200+ employees, defining the product roadmap, coordinating with engineering, and integrating expense reporting with treasury operations, reducing manual workflows by 30% and improving expense processing turnaround.
- Partnered with Philips Hue product management team to coordinate go-to-market activities for a 50,000+ user base, aligning fiscal, warehouse, and marketing teams on transaction communications, and delivering user behavior data to the analytics team that informed feature prioritization decisions.
- Identified a systemic process failure in daily EOD jobs by conducting root cause analysis across error categories, defining a resolution framework, and reducing recurring errors by 90%, demonstrating structured problem-solving and operational product thinking.
- Built a KPI tracking framework for 25+ monthly financial reports, performing data analysis and reconciliations to surface insights for leadership, enabling faster and more informed decision-making across business units.
- Directed 10+ Internal Control Systems (ICS) audits annually, collaborating with cross-functional business teams to identify risks, define mitigation plans, and ensure 100% regulatory compliance across processes.

SAP Finance Intern | Signify (Philips Lighting), Bangalore

Jan 2023 – Jul 2023

- Resolved ServiceNow incidents for Concur processes by gathering and analyzing business requirements, updating audit rules, and reducing ticket resolution time by 25% through process improvement.
- Assisted with SAP Finance Treasury workflows, gaining hands-on experience in cash management operations and cross-team coordination for payment processing.

PRODUCT MANAGEMENT FELLOWSHIP

Product Manager Fellow | Nextleap

2025

- Completed an intensive 8-week program covering the end-to-end product lifecycle: product discovery, problem framing, user research, ideation, wireframing, prototyping, and defining success metrics.
- Capstone Project: Defined a product requirement document (PRD) for a B2C feature, including user personas, competitive analysis, prioritized feature backlog (RICE framework), wireframes, and North Star metrics with measurable KPIs.

PROJECTS

Secondary TAT – Supply Chain Analytics Dashboard

- Built KPI framework for post-invoice delivery tracking and automated alerts via Paginated Reports for regional managers. (Python, SQL, Snowflake, Power BI)

Inshorts Product Teardown – Recommendation & Notification Strategy

- Proposed a News Quality Score replacing engagement-based ranking with source credibility, factual density, and uniqueness, ensuring 40% editorially curated content per feed.
- Redesigned notifications into a 3-tier system: Breaking, Daily Digest, and Weekly Roundup with category-level opt-in.

Khan Academy Product Teardown – Growth, Engagement & AI Strategy

- Analyzed engagement gap (11% activation among 945K licensed students), Khanmigo AI adoption issues, and competitive positioning vs. Duolingo.
- Recommended streak-based engagement overhaul (DAU/MAU 15% → 25%), proactive AI nudges for Khanmigo (5% → 30% interaction), and international B2B expansion via KAD Lite.

EDUCATION

SRM Institute of Science and Technology

2019 – 2023

B.Tech in Computer Science | CGPA: 8.7

SKILLS

Product & Strategy: Product Lifecycle Management, Roadmap Development, Feature Prioritization (RICE), PRD/BRD Creation, Requirements Gathering, User Research, User Personas, Competitive Analysis, Product Discovery, Go-to-Market Strategy, A/B Testing, KPI Tracking, OKRs, Stakeholder Alignment, Agile/Scrum, Sprint Planning, Backlog Management

Analytics & Data: SQL, Python, Power BI, Tableau, Snowflake, Google Analytics, CleverTap, Qlik Sense, Process Mapping, Data-Driven Decision Making
