WORK EXPERIENCE

Associate Product Manager | ***Midas Global Securities Pvt Ltd*** **Jan 2026 - Present | New Delhi**

*Lead product strategy and execution across **B2C investment services and in-house trading operations tools**.*

- **Own product strategy and execution for TradeFlow**, an in-house bookkeeping app built to record **₹50Cr+ in trades across 30+ clients** and track funding, interest, commission and profit share through to a settlement statement.
- Defined the **settlement rules (funding interest, commission modes, profit share, loss treatment)** in discussion with a trader, and tested them with 100+ automated tests and end-to-end scenarios, fixing data issues found along the way.
- Lead product workflows for **F&O trading and equity investments**, streamlining trade tracking and portfolio management across 100+ transactions per day and **₹10Lakh+ in daily trading activity**.

Business Analyst | ***Signify (Philips Lighting)*** **July 2023 - Dec 2025 | Bengaluru**

*Worked in Agile/Scrum teams on product discovery, delivery, and process improvements across **B2B enterprise products, B2C consumer experiences, and data platforms**.*

- Drove requirements for the Corporate Card product in an Agile/Scrum team, **gathering input from 200+ employees, writing PRDs, user stories, and acceptance criteria,** and helping prioritize the roadmap; integrated expense reporting with treasury operations, **reducing manual workflows by 30%.**
- **Partnered with the Philips Hue product team** on go-to-market for a **50K+ user base**, aligning fiscal, warehouse, and marketing stakeholders and using user behavior analytics to inform feature prioritization.
- **Identified recurring patterns in EOD job failures** through root-cause analysis and implemented process improvements that **reduced errors by 90%**, while supporting **10+ ICS audits** a year.
- **Built an end-to-end data platform** integrating operational data from Signify's global street-light network via APIs, Python, and Snowflake, iterating on approaches to handle data gaps across regions, and **delivered region-specific Power BI dashboards** for global performance monitoring.

SAP Finance Intern | ***Signify (Philips Lighting)*** **Jan 2023 - July 2023 | Bengaluru**

- **Improved Concur expense workflows** by analyzing business requirements, identifying recurring issues, and refining audit rules, reducing ServiceNow ticket resolution time by **25%**.
- Supported product and process improvements across SAP Finance and Treasury workflows**, collaborating with cross-functional teams** on cash management and payment operations.

PROJECTS

Group Riding Companion App | ***Personal Project***

- **Own the end-to-end product**, from problem discovery and user research to vision, PRD, UX/UI, build, and launch planning, with a phased **MVP roadmap** and documented product decisions.
- **Identified a group-ride safety gap,** interviewed riders across Delhi, Pune, and Bangalore to validate it, and ran a competitive analysis that pinpointed the differentiators: emergency detection and a licence-verified community.
- **Wrote the PRD** with user stories and acceptance criteria, **prioritized features (P0/P1/P2)**, and **set success metrics** (weekly active parties, DAU/MAU, KYC completion, no-show rate).
- **Built a working Flutter app: 28 screens**, phone login, ride parties, live location, web demo live. Designed push-to-talk, emergency detection, KYC, and ratings, **making tech trade-offs** (Flutter vs React Native, PTT SDK, maps) with DPDP data privacy in mind.

Supply Chain Analytics Dashboard

- Built a **post-invoice delivery KPI dashboard** using Python, SQL, Snowflake, S3, and Power BI, with automated alerts to proactively identify shipment delays.

EDUCATION & CERTIFICATION

Product Manager Fellowship | ***Nextleap*** **Oct 2025 - Dec 2025 | Bengaluru**

- Completed an 8-week intensive covering the full PM lifecycle: discovery, problem framing, user research, wire-framing, prototyping, and success metrics definition.
- Covered frameworks including RICE prioritization, Jobs-to-be-Done, user story mapping, OKR setting, and go-to-market planning across 8 structured modules.

Bachelors of Technology | ***SRM Institute of Science and Technology*** **July 2019 - June 2023 | Chennai**

- Graduated with First Class Honors and Distinction in Computer Science.

SKILLS AND TOOLS

- **Product Management:** Product Lifecycle Management | Product Roadmap development | Feature Prioritization | Market Research | User Feedback Analysis | Data-driven Decision making | KPI Tracking | A/B Testing | Go-to-Market (GTM) strategy | PRD creation | Stakeholder Alignment | Product Discovery | Agile & Scrum | Sprint planning | Remote collaboration | Project coordination | Leadership | Cross-functional collaboration.
- **Technical**: SQL | Python | C++ | HTML | CSS | JavaScript | REST APIs | SAP (FICO, TRM, ABAP) | GCP | Amazon S3 | Git/GitHub | Generative AI (ChatGPT, Lovable.dev)
- **Prototyping & Design:** Figma (including AI plugins) | Balsamiq | Whimsical | Miro | Wireframing | Lovable.dev
- **Project Management Tools:** JIRA | ClickUp | Excel | Trello | Notion | Confluence | ServiceNow | Concur
- **Analytics & BI Tools :** SQL | Python | Tableau | Power BI | QlikView | Qlik Sense | CleverTap | Google Analytics | Snowflake | Data-Driven Decision Making | Process Mapping
